ABSTRACT: A good student improves more if he is admitted in a good school. Here equal competition helps him to shine properly. In contrast a bad or mediocre student cannot cope with the speed of the good students. He suffers from inferiority complex due to unequal competition that compels him to be a drop out. The teachers know it. They apply this strategy during admission. But the parents do not know it. Also they want not to obey it. All parents think that their issues are very talented. This wrong notion is a hindrance for the success of the bad students. As such the theory goes good student shines in good environment and mediocre student shines in mediocre school. And bad and inattentive student can prosper never and nowhere.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform, rather it reveals. So it bears no reference. The best creative writing is critical, and the best critical writing is creative. This article is an outcome of thinking about creative writing meant for a general readership. As such, I have adopted a free style methodology so that everyone can enjoy the pleasure of reading. As you might know, Francis Bacon (1561-1626), the immortal essayist, wrote many essays namely 'Of Love', 'Of Friendship', 'Of Ambition', 'Of Studies', and so on. The multiple-minded genius correctly pointed out that all the words of the dictionary can be used as themes for essays. But little has been done since his death to continue or finish his

monumental task. Bacon's unique individual style of presentation ignited my imagination and encouraged me to write creative essays as a method of relieving a wide range of emotions through catharsis.

ARTICLE

Applicable is that concerns somebody or something. It is relevant to somebody or something. For example: This part of the form is only applicable to married women.

It is affecting or relating to a person or thing: For example: The new qualifications are applicable to all European countries.

It is capable of or suitable for being applied. It implies appropriate. For example: A fee is applicable when a scheduled payment is late.

Applicable is a logical term. It is also a legal term. To judge the applicability of anything intellect is required. Here suitability or appropriateness is relevant. Sequence is very important. If sequences are not properly maintained then desired result is never obtained rather consequence of haphazard activities becomes very frustrating.

“Strike the iron when it is hot” is a wise saying. It is a guide line of practical importance. It means that opportunity does not last long. The duration of favourable time is very limited. So a judicious person avails the chance forthwith and gets success easily and timely.

In contrast a fool does not or cannot avail the chance of opportunity for lacking in talent. He sits idle when the iron is hot and hits the iron when it is cold thereby loses both the ways. A cold iron cannot be shaped easily as desired. Much effort is required in this regard in contrast of less effort which is sufficient in case of favourable time.

Sense of suitability is very important in human life. Suitability is not culture free. What is suitable in one culture is not applicable in another culture. As such before doing anything in a new culture proper verification is a must to avoid complicity.

In cooking recipe is very important. Each recipe is unique. One recipe is not applicable to another dish. A chef knows it. Two recipes may be similar to some extent but different in otherwise.

There is global issue. There is local issue. Generally, global issue cannot be applied locally. Similarly, local issue cannot be globalised. The two contexts are quite different being robust and small respectively. An ordinary person cannot do it. But an extraordinary talent can convert global into local and local into global whenever and wherever are required through his immense capacity coupled with innovative mechanism.

Adult movie is not applicable to children. It vitiates the thinking and morality of the tender

souls due to immaturity. They cannot distinguish between good and bad. They do not know which one is to accept and which one is to ignore. They become diverted from normal course of life. For this children movie is suitable for full blooming of the innocent buds. Universal movie is best of all. Here the movies can be enjoyed with the whole family. It strengthens the bondage among the family members. The children will not face loneliness. They will think that they are cared. They will be loyal to the seniors. They will love all and they will be loved by all as reciprocation.

In mathematics step jump is allowed in some sums. But this is not applicable in all operations. The student must have to prove to the examiner the detail of the answer of the concerned question as asked for. He must have to prove his thorough knowledge on the concerned topic.

What recipe is applicable in milk product is not applicable in meat. Here both recipe and ingredients are different.

Different communities have different food habits. Obviously, they may eat common food. The host arranges different venue for different communities to avoid any unwanted social complicity. Here, not voice of host rather choice of guest is final. The host, to show adequate respect to the sentiment of the guests, follows their liking as sincerely as possible. It is called manner a part of etiquette.

Capitalism is not applicable in socialistic society. Both the systems are diagonally opposite with each other. Both are rivals. Both claim superiority over the other. People are the last chooser of the system. The politician can rule for sometime but cannot continue for long. The system is changed as per sweet will of the people. History is the witness of such numerous events. Yet the protagonists do not take lesson from this severity. They are actually callous tyrant.

Basic rules of all grammars are identical. If a person can learn the grammar of his mother tongue (L1) then he can easily grasp any foreign language (L2) easily. He learns L2 through the applicability of L1.

Similarly, if a student can learn any computer language then he can grasp other languages at ease following similarity and corresponding dissimilarity between two languages. As such the teacher advises to learn any language perfectly. Here perfection is the main factor. Perfection has no substitute. Perfection itself is its substitute. As such perfection can be applied anywhere and really is applicable everywhere.

Obviously, there is sharp difference between human language and computer language. Human language is guided by emotion and computer language by motion. The difference is like man and machine. Machine offers similar and perfect output. In contrast the outcome of human being is uneven.

The formality or ritual of one culture is not applicable in another culture. Even two communities of same culture may differ in observing the religious beliefs.

The food habit of vegetarian is different than non-vegetarian. It seems, generally, the vegetarian becomes cool tempered than non-vegetarian. As such the relation between these two communities is temporary and fragile in nature. They differ in emotion and attitude. Here education compensates the gap.

Gesture of open society is not applicable in conservative family. Beckon is a tool for communication between lovers. Beckon or kiss is strictly prohibited in orthodox society. In patriarchal society love or open sex or extra-marital affair is considered as crime and sin. The wage of such activity is honour killing. The lovers face it. They know the non-applicability of free mixing. The self-proclaimed guardians punish them to protect the chastity of the patriarchy. Yet the lovers do it even taking the risk of their life even. Emotion or passion regulates their movement. To them love for a single day is far better than life for thousand years without love.

Teaching methodology of any nation is unique. It differs from nation to nation. Thus the methodology of Japan is not applicable in

Johannesburg. There are few techniques which can be applied in any class of the world. This is culture free and termed as universal technique.

Children are of two types viz., ruly and unruly. There is no problem with the ruly i.e. obedient children. They carry out the orders sincerely. But it is very difficult to control the unruly children who are violent in nature. Forceful application is very dangerous.

Adamant children should not be treated adamantly. Rather they should be treated with utmost care and tenderness. Then they cannot fight against calm and quiet opponent who bears all and everything. They become confused how to show anger and they cannot attack a non-attacking person. They shout. They rebel. But they cannot continue for long since there is no opposition or obstruction or tyrant ruler. Ultimately they become calm. They become obedient. It is non-violence strategy against violent movement. It is really an innovative technique.

The remedy of hard question is soft reply. Soft reply dilutes the hardness. Similarly, the answer of a soft question may be tough enough. Very few persons can guess it and answer it accordingly. An expert can convert a difficult problem into a simple one and a simple problem into a difficult one with his immense expertise. Thus formula of difficult is not applicable in simple issue and vice versa. Both are unique and different in nature.

If someone comes with much anger and faces no obstruction, he becomes surprised. Then he becomes ashamed. He realizes that it is not judicious to think negatively without being sure and certain of anything or event or situation. Anger affects both body and mind. Baseless anger harms someone more severely both socially and psychologically.

A good student becomes morose if questions are easy. He searches the difficult questions to prove his expertise and impress the examiner accordingly. In this way he isolates himself. The examiner gets relief from monotonous answer script and assigns higher grade to the good student.

A good student improves more if he is admitted in a good school. Here equal competition helps him to shine properly. In contrast a bad or mediocre student cannot cope with the speed of the good students. He suffers from inferiority complex due to unequal competition that compels him to be a drop out. The teachers know it. They apply this strategy during admission. But the parents do not know it. Also they want not to obey it. All parents think that their issues are very talented. This wrong notion is a hindrance for the success of the bad students. As such the theory goes good student shines in good environment and mediocre student shines in mediocre school. And bad and inattentive student can prosper never and nowhere.

To judge the applicability is very important. Here the factors viz., when, how and where are very important. Only a wise can apply perfectly. A fool cannot do it. Guess activity offers no desired result. In the standard formula applicability is known. It is called theory. In case of hypothesis the applicability is unknown. Here through trial and error method the theory is established.

Trial and error method is the best method for its thoroughness. This method examines all the hypotheses individually. When truth is established then hypothesis is accepted as theory. Till the hypothesis is proved applicability cannot be confirmed. As such Research and Development

(R&D) section of any establishment, both private and public, spends much fund to know the applicability of anything. The span of research work and use of fund both are uncertain. Here perseverance is the only avenue to know the truth. Basing on truth applicability can be confirmed.

Same journey but different fruit is observed either due to bad luck or nepotism. Here rule should be applicable equally. But in reality this does not happen always. Here any opportunity is either sold by secret auction or offered to a near and dear one for the sake of nepotism. A poor but deserving candidate or an applicant having no lobby is quite helpless in this regard. Justice is only obtained when the authority is impartial and applies same rule equally without being biased.

CONCLUSION

Application is unique. So, universal application is impossible. There is tit for tat and paid back by its own coin policies. It is alias and akin to revenge. Good behavior reciprocates as good behavior. Bad behavior returns back as bad behavior. Good behavior can convert bad behavior into good. Similarly, good company can convert a bad person into good. Here lies the superiority of goodness. As such, good is applicable everywhere in every age.
